Notes										
London office data has not been used in EPRA reporting. The office accounts for less than 0.5% of electricity consumption across the portfolio. The London office has been captured in the mandatory reporting figures.										
Actual data has been used for reporting wherever possible, however some estimated data has been used where data has not been available. The information in this report represents the best information available at the time of issue (23/02/2016).
